## WWI Newspaper Assignment

Each group of three to five students is to create the front page of a newspaper that deals with events surrounding World War I. The newspaper will contain five articles related to the event. Included are the three below and at least two additional articles, all on the front page. The latter two articles may be related to the economy, culture, or technology. A complete works cited sheet for both images and research material, with a minimum of five diverse sources, must be included. Refer to any standard, daily newspaper for size and style.

### Article One

One article will include the personal story of a soldier from Montclair who served and lost his life in the Great War. You are to locate the name of a soldier and create an imaginary letter home, or a report on where he served, what he saw and how he was killed.

### Article Two

A second article will concentrate on an interview with a notable player from the war. You must choose an individual and create a fact based interview with him/her regarding the War and his/her role in it.

### Article Three

This article will be based on an event significant to the War. You will research and choose one, then write a detailed story to include on the cover.

### Images

The cover of your newspaper should include images of the time. Photos, cartoons, drawings, propaganda or other images used must be related to an article. (They may not be high quality due to printing from the Web - that's ok.)
